

Drone Security Assessment Report

Security posture summary for live and simulated drone scans

Assessment Report - generated 2026-04-26 21:01 UTC

Analyst: GPtool

Scan type: Live drone scan

72

/ 100

ATTACK

One or more attacks are trivially feasible.

Scoring method: Rule-based (ISOT-informed)

Score Breakdown

Each factor below contributed directly to the score.

- port 14550 +25

Likely Attack Vectors

ISOT attack categories that are feasible given the observed posture, ranked from most to least feasible.

DoS

Drone Fingerprint

Model	Unknown Model
Wi-Fi	Unknown SSID (Unknown)
Open Ports	8889, 14550
Protocols	Unknown
Firmware Hint	Unknown

Vulnerabilities

Test

HIGH

Enables: DoS · Feasibility: z

x

Recommendation: y

Safe Test Results

Test	Result
Ping reachability	Success (loss: 0.0%)
Round-trip latency	10.0 ms (5 samples)
Diagnostic packet	OK — ok
